PROJECTS

E-Commerce App

An e-commerce platform featuring user authentication and order processing.

- Designed and implemented RESTful APIs for seamless communication between frontend and backend components.
- Utilized MongoDB with Mongoose for efficient data modeling, storage, and retrieval.
- Deployed the application to cloud platforms like Render and Netlify.

Hotel Booking Application

A hotel booking application to manage reservations.

- Implemented user-friendly Login and Signup operations.
- Ensured secure authentication using JSON Web Tokens (JWT).
- Implemented CRUD operations for hotel listings and user bookings.

Quiz App

An interactive quiz application for engaging users.

- Engineered a quiz environment with timers, live scoring, and instant results.
- Orchestrated an immersive user experience with animations and features.
- Added questions dynamically using an array of objects in JavaScript.

Todos Application

A simple task management application.

- Created a single page application using HTML, CSS, and JS.
- Added validation features for task inputs.
- Provided task edit and delete functionality.
